PEX Plumbing Education: RedVector Online

PPI has partnered with RedVector to provide our CEU-style education course “**Designing PEX Plumbing Systems to Optimize Performance and Efficiency**” online.

[RedVector](#) is a leading provider of online education content for a wide range of industries including architecture, engineering, construction, chemical processing oil and gas, mining, and more. They offer fee-based courses for engineers, architects, contractors and other design professionals.

The narrated course has five learning objectives, and advances at the pace of each student. Topics include properties of PEX tubing and fittings, types of plumbing layouts, designing for optimized performance, installation, and design resources.

The course is approved by the Architectural Institute of America (AIA) for 1.0 Learning Unit HSW (Health, Safety and Welfare), a recognized accreditation. Students can receive an online certificate.
